

SMOKEY'S JULY TIP

The July Message is Simple

**“THERE IS NO SAFE WAY TO USE
FIREWORKS”**

Even the smallest firecrackers are explosives.

Sparklers, Believed by many to be safe for children, have caused many tragic clothing fires and blinding accidents.

Manufacturing errors can make them go haywire, sending them into users and innocent bystanders, blinding and crippling as they fly.

Leave it to the Professionals, Go to community Fireworks displays, sit back and enjoy the show.

“Have a safe 4th of July”
